

## 5.3 Tour of Sun City West Stardust Theater

By Committee member Dan Haberman

### What They Wanted to Change:

- Need more storage
- Need bigger shop area to build sets
- More stage area to put sets while waiting to go out for use
- Space for live music – band and orchestra – for theater performances, i.e. Musicals
- Bigger lobby to host social events before and after performances – Happy Hour

### Other:

- Flooring that is easy to maintain. Carpet is hard to keep clean.
- Concession available
- Theater setting is good for theater performances but not much else.
- No flexibility.
- Rear Projector – could easily replicate things like weather (rain, snow); would eliminate some set building
- Lights need to be positioned right
- Too many clubs using the theater becomes problematic.
