

OPTIONS FOR MOUNTAIN
VIEW

By Tom Trepanier

Presented to SAC July
2023

I. Mountain View Renovations - proceed basically as per Option 1B.

- A. Build PAC at Mountain View - 20,000 sq ft, retractable seating, storage, etc.
- B. Renovate pools - resort pool, lap pool, sport
- C. Build new fitness space/ Gym - build this similar to design as already laid out in MV Option 1B plan. This would be for multiple uses such as: dance, basketball, pickleball, badminton, volleyball, yoga, aerobics, etc.

Reasoning:

Plans are already developed. PAC club members have been waiting for a long time and deserve this to be completed sooner than later. A gym area would be very versatile to provide many different types of activities - including ones that may not have a lot of people that want to participate, but would allow for 1-3 times per week scheduled events. Any city with 40,000 residents should have at least one multi-purpose gym.

II. Additional Mountain View options

- A. Convert the MV tennis courts to pickleball courts. Possibly even enclosing all in a climate controlled structure to allow for playing all times of day/all seasons

- B. Remove the existing MV lawn bowling for additional pickleball and/or additional parking

Reasoning:

Need more courts to support growing popularity of pickleball

III. Providing all season play with current pickleball facility at Marinette

A. Enclose pickleball pavilion to make it climate controlled

Reasoning:

As above and it would lessen the need for so many additional pickleball courts if they could play all hours.
