

## IN SUMMARY

THESE are not the options that the committee have agreed or voted on. THESE are the options that John and other board members are shoving down the committees throat. Just because you are the Committee Chair John and you presented #1 during the presentations (and it was soundly voted AGAINST by the committee at the time) shouldn't mean that you get to bring back YOUR FAVORITE option as the default time and time again while you ignore the committee's recommendations and votes. WHY DID THE BOARD create this committee at all? WHY did you waste all of our time for months if the BOARD MEMBERS on the committee are going to just shove down our throats what YOU want as the final result. I frankly feel hoodwinked by this whole thing. It is very clear that the BOARD MEMBERS agenda is to spend the absolute least amount possible to "slap lipstick on a pig" at Mountainview so you can wipe the renovation and improvement of Mountain View totally off of the PIF plan and then 100% of remaining focus and monies go to Lakeview - a project that isn't even currently ON the FUTURE PIF plan at all. Meanwhile poor Mountainview that has been on the PIF plan for AT LEAST 15 years now has been shunted aside over and over for other favorite projects by board after board over the years. This all just makes me feel manipulated and sad.
