

Response to Johns opening remarks for today's meeting.

Pickleball not have a climate controlled building just for their club. Pickleball players were offered 12-14 courts at Lakeview also getting courts at Mountain View. The club president and vice president at the time were completely satisfied with this plan. Karen McAdams has been pushing this and was instrumental in stopping the construction of the Mountain View project. It is a conflict of interest and Karen as a board member is not suppose to push her personal agenda (pickleball) no exceptions.

The multi-purpose auditorium will benefit several clubs and the community more. Adult basketball, volleyball and pickleball can all utilize the space besides the dancers and one club will not get it all. The original plan included fitness area, storage area, moveable curtain between courts for volleyball, basketball (pickleball could be added). If you want the WOW factor this is where you will be get it and not pickleball. All around the valley you just have to look on the internet and find adult volleyball, basketball and pickleball being played. Our dance clubs have been asking for usable flat space. I have said several times that the spaces that we have to move to do not work. We had to move during the floor refinishing at Sundial and only 60 dancers went to Mountain View to dance because of the floor, if all our members attended it would not have been enough room for all the different styles of dancing that we need space for. We are not so self-serving that we expect usable flat space with wood floor just to accommodate dance clubs. I have attached pictures as examples.
